LACTATION > ad libitum

<sup>1</sup> Weight at mating.

In case of acute disease, regeneration of the intestinal villi requires the nutritional management to last for at least three weeks.

To optimise digestion, the recommended daily intake should be divided into several small meals.

For the mixed feeding table please see the end of the section Gastrointestinal Tract

### REHYDRATION:

- Add twice the volume of hot water to the kibbles (20 mL of water per 10g of kibbles).

- Wait 15-20 minutes for the kibbles to get soaked.

- Mash with a fork to obtain 'porridge' texture

- Serve once cooled down (body or room temperature)
